

## CPA 751 – East Downtown Profile: Leading Causes of Premature Mortality

Leading Causes *** of Premature Mortality, 2003-2007		City of Toronto **	Toronto Central LHIN	East Downtown
<b>Premature Mortality **** Age &lt;75, 2003-2007 (Total Count)</b>		29,038	13,574	1
<b>Top 5 Leading Causes of Premature Mortality, 2003-2007 (%)</b>	1	Ischaemic heart disease 13.0	Ischaemic heart disease 13.0	Ischaemic heart disease 12.8
	2	Cancer of lung & bronchus 9.2	Cancer of lung & bronchus 9.4	Cancer of lung & bronchus 8.3
	3	Cancer of colon, rectum, anus 4.5	Cancer of colon, rectum, anus 4.2	HIV or AIDS 7.1
	4	Diabetes 3.9	Diabetes 3.8	Intentional self harm 4.9
	5	Cerebrovascular diseases 3.8	Intentional self harm 3.7	Cirrhosis and other liver diseases 3.4

Dash ( – ) Number and rate are suppressed since numerator is less than 5.

\* Rates based on fewer than 20 events are likely to be unstable and imprecise.

\*\* Toronto numbers are the total of all geocoded data and table excludes records with missing/incomplete/invalid postal codes.

\*\*\* Leading cause of death is based on World Health Organization (WHO) ICD 10 code groupings and modifications by Association of Public Health Epidemiologists in Ontario (APHEO).

\*\*\*\* Premature Mortality - deaths at age less than 75 years. It is a measure that gives more weight to the death of younger people than to older people as deaths of younger people are often preventable.

Data Source: Ontario Mortality Data 2003-2007, Ontario Ministry of Health and Long-Term Care, IntelliHEALTH ONTARIO. The data were extracted in March, 2011.
