 $\label{eq:cl} \textbf{COnfidence Interval; LL} = Lower Limit; UL = Upper Limit$ 

H/L/NS Chances are at least 19 in 20 that the rate is higher (H) or lower (L) than the City of Toronto rate (p < 0.05). Rates marked not significantly (NS) different do not reach this level of significance.

<sup>a</sup> Denominator: Ontario Ministry of Health and Long-Term Care Registered Persons Database (RPDB), population with at least one health claim in the previous five years.

+ Numerator: derived from validated, disease registries maintained by the Institute for Clinical Evaluative Sciences (ICES)

Diabetes derived from the Ontario Diabetes Database (ODD) maintained by the Institute for Clinical Evaluative Sciences (ICES) \* Rates based on fewer than 20 events are likely to be unstable.

\*\* Rate ratios for both sexes were created by dividing the local area rate by the City of Toronto aggregate rate.

**†** Rates are age-standardized using the direct method and the 1991 Canada population as the standard population.

CI Confidence Interval; LL = Lower Limit; UL = Upper Limit

H/L/NS Chances are at least 19 in 20 that the rate is higher (H) or lower (L) than the City of Toronto rate (p < 0.05). Rates marked not significantly (NS) different do not reach this level of significance.

<sup>a</sup> Denominator: Ontario Ministry of Health and Long-Term Care Registered Persons Database (RPDB), population with at least one health claim in the previous five years.

Numerator: derived from validated, disease registries maintained by the Institute for Clinical Evaluative Sciences (ICES)
Mental health conditions are defined by the occurrence of a doctor's visit for a symptom related to mental health. Non-OHIP (Ontario Health Insurance Plan) claims are not available.

\*\* Rate ratios for both sexes were created by dividing the local area rate by the City of Toronto aggregate rate.

+ Rates are age-standardized using the direct method and the 1991 Canada population as the standard population.
