| % of ALC hospital days                                  | 17.3            | 20.1      | 18.8       | 18.3                 | 21.0    | 19.7       | 15.0<br>(14.2-15.8) | 20.3<br>(19.5-21.1) | 18.1<br>(17.5-18.6) | 0.96 L       |
| All Ages  |                 |           |            |                      |         |            |                     |                     |                     |              |
| # of inpatient days (2 yrs) <sup>a</sup>                | 987,902         | 1,125,802 | 2,113,704  | 441,053              | 485,215 | 926,268    | 9,655               | 13,217              | 22,872              |              |
| # of ALC days for 2 years ±                             | 131,377         | 155,580   | 286,957    | 60,874               | 68,920  | 129,794    | 1,340               | 2,197               | 3,537               |              |
| Age-Adjusted rate of hospital days that are ALC †       | 12.0            | 12.0      | 12.0       | 12.8                 | 12.7    | 12.7       | 13.9<br>(13.1-14.6) | 12.3<br>(11.8-12.8) | 12.8<br>(12.4-13.2) | 1.07 H       |

**CI** Confidence Interval; LL = Lower Limit; UL = Upper Limit

**H / L / NS** Chances are at least 19 in 20 that the rate is higher (H) or lower (L) than the City of Toronto rate ( $p < 0.05$ ). Rates marked not significantly (NS) different do not reach this level of significance.

**Population** Population - Based on 2011 Census population estimates, Statistics Canada.

<sup>a</sup> Denominator: Total number of inpatient days for 2 year (2011-2012) observation period.

Data source: Canadian Institute for Health Information (CIHI)

± Numerator: Total number of Alternate Level of Care (ALC) Days for 2 year (2011-2012) observation period.

Data source: Canadian Institute for Health Information (CIHI)

**Rate** Represents the percent of hospital days that are Alternate Level of Care (ALC) for 2 year (2011-2012) observation period

\* Rates based on fewer than 20 events are likely to be unstable and imprecise.

**Dash ( - )** Number and rate are suppressed since numerator is less or equal to 5 or due to missing/incomplete data.

For any cell (numerator OR denominator) less than 6, additional cells will be suppressed to disallow the calculation of the missing (suppressed) cell. Reported totals include suppressed cells.

\*\* Rate ratios for both sexes were created by dividing the local area rate by the City of Toronto aggregate rate.

† Rates are age-adjusted using the direct method and the 1991 Canada population as the standard population.
