

## N112 – Beechborough-Greenbrook Profile: Hospital Admissions

Indicators	City of Toronto	Toronto Central LHIN	Beechborough-Greenbrook	
	: Females : : :	: Females : : :	: Females : : (95% CI) :	: Rate : Ratio**
<b>Prenatal Hospital Admissions (2011-2012) ±</b>	: : : : : :	: : : : : :	: : : : : :	: : : : : :
Total Population Ages 15-49 <sup>a</sup>	: 687,795 :	: 315,930 :	: 1,795 :	: : : :
# of Hospitalizations (2 yrs) ±	: 33,330 :	: 12,241 :	: 113 :	: : : :
Age-Adjusted average rate of hospitalizations per 1,000 †	: 18.7 :	: 17.1 :	: 29.4 : : (23.9-34.8) :	: 1.57 H

**CI** Confidence Interval; LL = Lower Limit; UL = Upper Limit

**H / L / NS** Chances are at least 19 in 20 that the rate is higher (H) or lower (L) than the City of Toronto rate ( $p < 0.05$ ). Rates marked not significantly (NS) different do not reach this level of significance.

<sup>a</sup> Denominator: Total Population - Based on 2011 Census population estimates, Statistics Canada.

± Numerator: All unscheduled Hospital admissions for Prenatal conditions for 2 year (2011-2012) observation period.  
Data source: Canadian Institute for Health Information (CIHI)

**Rate** Represents the average annual rate of hospitalizations for 2 year (2011-2012) observation period

\* Rates based on fewer than 20 events are likely to be unstable and imprecise.

**Dash (–)** Number and rate are suppressed since numerator is less or equal to 5 or due to missing/incomplete data.

For any cell (numerator OR denominator) less than 6, additional cells will be suppressed to disallow the calculation of the missing (suppressed) cell. Reported totals include suppressed cells.

\*\* Rate ratios were created by dividing the local area rate by the City of Toronto aggregate rate.

† Rates are age-adjusted using the direct method and the 1991 Canada population as the standard population.
