

N27 – York University Heights Profile: Hospital Admissions

Indicators	City of Toronto	Toronto Central LHIN	York University Heights	
	Females (95% CI)	Females (95% CI)	Females (95% CI)	Rate Ratio**
Prenatal Hospital Admissions (2011-2012) ±				
Total Population Ages 15-49 ^a	687,795	315,930	7,795	
# of Hospitalizations (2 yrs) ±	33,330	12,241	448	
Age-Adjusted average rate of hospitalizations per 1,000 †	18.7	17.1	25.2 (22.8-27.5)	1.34 H

CI Confidence Interval; LL = Lower Limit; UL = Upper Limit

H / L / NS Chances are at least 19 in 20 that the rate is higher (H) or lower (L) than the City of Toronto rate ($p < 0.05$). Rates marked not significantly (NS) different do not reach this level of significance.

a Denominator: Total Population - Based on 2011 Census population estimates, Statistics Canada.

± Numerator: All unscheduled Hospital admissions for Prenatal conditions for 2 year (2011-2012) observation period.
Data source: Canadian Institute for Health Information (CIHI)

Rate Represents the average annual rate of hospitalizations for 2 year (2011-2012) observation period

***** Rates based on fewer than 20 events are likely to be unstable and imprecise.

Dash (–) Number and rate are suppressed since numerator is less or equal to 5 or due to missing/incomplete data.

For any cell (numerator OR denominator) less than 6, additional cells will be suppressed to disallow the calculation of the missing (suppressed) cell. Reported totals include suppressed cells.

****** Rate ratios were created by dividing the local area rate by the City of Toronto aggregate rate.

† Rates are age-adjusted using the direct method and the 1991 Canada population as the standard population.
