Rate ratio				0.83 L	0.91 L	0.89 L
Aged 75 & over	54,320	82,380	136,625	320	460	785
% With Activity difficulties/reductions	62.4	67.3	65.3	65.6	73.9	71.3
95% CI				(60.4, 70.8)	(69.9, 77.9)	(68.9, 73.8)
Rate ratio				1.05 NS	1.10 H	1.09 H

C I - Confidence Interval

H/L/NS - chances are 19 in 20 that the rate is higher (H) or lower(L) or not significantly (NS) different than the aggregate (city) rate.

¹ The census includes questions to identify persons with limitations in the amount and kind of activities at home, at work, at school or in other activities due to a physical or mental condition or health problem lasting six months or more. The responses are used to identify persons for a post census survey on disability. The wording of the census screening questions differed between 1996 and 2001 with the 2001 census capturing a larger sample.

The rates for the two time periods are not comparable with each other. The 2001 census questions is similar to the CCHS question on activity limitation.
