Aged 75 & over	54,320	82,380	136,625	130	215	340
% With Activity difficulties/reductions	62.4	67.3	65.3	76.9	62.8	69.1
95% CI				(69.7, 84.2)	(56.3, 69.3)	(65.4, 72.8)
Rate ratio				1.23 H	0.93 NS	1.06 NS

CI - Confidence Interval

H/L/NS - chances are 19 in 20 that the rate is higher (H) or lower(L) or not significantly (NS) different than the aggregate (city) rate.

¹ The census includes questions to identify persons with limitations in the amount and kind of activities at home, at work, at school or in other activities due to a physical or mental condition or health problem lasting six months or more. The responses are used to identify persons for a post census survey on disability. The wording of the census screening questions differed between 1996 and 2001 with the 2001 census capturing a larger sample.

The rates for the two time periods are not comparable with each other. The 2001 census questions is similar to the CCHS question on activity limitation.
