House: Detached or Semi-detached	181,085	56.8	570	41.6	620	44.3	6.4
High Rise (Apartment 5 or more stories)	104,855	32.9	680	49.6	665	47.5	-4.3
Other Dwelling Types	33,130	10.4	130	9.5	110	7.9	-17.2
<b>Institutional Dwelling</b>							
Number of Long Term Care (LTC) Homes (formerly called Facilities)	94				1		
Number of beds	16,429				110		

Dash ( - ) number and rate are suppressed since either numerator is less than 5 or denominator less than 30.

\* Data not available for 1996

\*\* Interpret with caution

Notes:

- Total for both sexes is slightly different from the sum for males and females and total for all the areas is also slightly different from the sum of all individual areas due to random rounding by Statistics Canada. In the section on Persons in Private Households where random rounding resulted in percents higher than 100%, the percents were reported as 100%.
- LTC data is as of March 2004 and includes planned for 2005 and projected for 2006.

% With Activity difficulties/reductions	62.4	67.3	65.3	63.8	62.2	62.0
95% CI				(57.7, 70.0)	(57.2, 67.1)	(58.6, 65.3)
Rate ratio				1.02 NS	0.92 L	0.95 NS

C I - Confidence Interval

H/L/NS - chances are 19 in 20 that the rate is higher (H) or lower(L) or not significantly (NS) different than the aggregate (city) rate.

<sup>1</sup> The census includes questions to identify persons with limitations in the amount and kind of activities at home, at work, at school or in other activities due to a physical or mental condition or health problem lasting six months or more. The responses are used to identify persons for a post census survey on disability. The wording of the census screening questions differed between 1996 and 2001 with the 2001 census capturing a larger sample.

The rates for the two time periods are not comparable with each other. The 2001 census questions is similar to the CCHS question on activity limitation.
