House: Detached or Semi-detached	181,085	56.8	270	15.3	280	15.6	2.5
High Rise (Apartment 5 or more stories)	104,855	32.9	1,215	68.6	1,305	72.9	6.2
Other Dwelling Types	33,130	10.4	285	16.1	180	10.1	-37.5
<b>Institutional Dwelling</b>							
Number of Long Term Care (LTC) Homes (formerly called Facilities)	94				5		
Number of beds	16,429				490		

Dash ( - ) number and rate are suppressed since either numerator is less than 5 or denominator less than 30.

\* Data not available for 1996

\*\* Interpret with caution

Notes:

- Total for both sexes is slightly different from the sum for males and females & total for all the areas is also slightly different from the sum of all individual areas due to random rounding by Statistics Canada.
- LTC data is as of March 2004 and includes planned for 2005 and projected for 2006.

% With Activity difficulties/reductions	62.4	67.3	65.3	65.9	70.0	67.2
95% CI				(59.6, 72.2)	(65.8, 74.2)	(64.4, 69.9)
Rate ratio				1.06 NS	1.04 NS	1.03 NS

C I - Confidence Interval

H/L/NS - chances are 19 in 20 that the rate is higher (H) or lower(L) or not significantly (NS) different than the aggregate (city) rate.

<sup>1</sup> The census includes questions to identify persons with limitations in the amount and kind of activities at home, at work, at school or in other activities due to a physical or mental condition or health problem lasting six months or more. The responses are used to identify persons for a post census survey on disability. The wording of the census screening questions differed between 1996 and 2001 with the 2001 census capturing a larger sample.

The rates for the two time periods are not comparable with each other. The 2001 census questions is similar to the CCHS question on activity limitation.
