

Spatial Relationship between Diabetes Prevalence Rates and Walkability Index* Scores, by 2006 Census Tract

*Walkability Index comprised of:

1. Population density (2006 Census)
2. Residential dwelling density (2006 Census)
3. Street connectivity (DMTI Spatial Inc., 2006)
4. Number of retail outlets in a 10 minute walk (Dunn & Bradstreet Inc., 2008)

Age- and sex-adjusted Diabetes rates (2007)		Walkability Index* (2006-2008)	
	High	and	Low
	High	and	High
	Low	and	High
	Low	and	Low
	Relationship not statistically significant		
	CT excluded from analysis		
	Census Tract boundary (2006)		
	Major street		
	Highway/expressway
