HPA - Health Planning Area

CI - Confidence Interval (lower limit, upper limit)

H/ L/NS - chances are 19 in 20 that the rate is higher (H) or lower(L) or not significantly (NS) different than the aggregate (city) rate.

Dash (-) number and rate are suppressed since numerator is less than 5

Toronto numbers are the total of all geocoded data and table excludes records with missing/incomplete/invalid postal codes.

***** rates based on fewer than 20 events are likely to be unstable and imprecise.

****** Rate ratios for both sexes were created by dividing the local area rate by the City of Toronto aggregate rate.
