Rate ratio				1.04 H	0.97 NS	1.01 NS
Aged 75 & over	54,320	82,380	136,625	2,550	3,750	6,310
% With Activity difficulties/reductions	62.4	67.3	65.3	60.6	67.1	64.3
95% CI				(58.7, 62.4)	(65.6, 68.6)	(63.5, 65.5)
Rate ratio				0.97 NS	1.00 NS	0.99 NS

CI - Confidence Interval

H/L/NS - chances are 19 in 20 that the rate is higher (H) or lower(L) or not significantly (NS) different than the aggregate (city) rate.

<sup>1</sup> The census includes questions to identify persons with limitations in the amount and kind of activities at home, at work, at school or in other activities due to a physical or mental condition or health problem lasting six months or more. The responses are used to identify persons for a post census survey on disability.

The wording of the census screening questions differed between 1996 and 2001 with the 2001 census capturing a larger sample.

The rates for the two time periods are not comparable with each other. The 2001 census questions is similar to the CCHS question on activity limitation.
